

K-Love is the only station that has made a prfound effect on my life. I could not imagine having to go a single day without listening to this incredible station. The world is a better place having this staion on the air , they incourage a postive life style. This station encourages spending time with your family as a reward not a burden that was placed on you. It would be a tradgedy for this station to become a LPFM. So many listeners would loose this frequency causing so many people to loose the uplifting encouraging message that K-Love endures. Why would the FCC want to change a station that is so postive and makes people feel good about themselves when we live in such turbulent times? This station is blessed by God and when God is for you let no man be against you. So with that, the FCC is either for K-Love or against them. So choose what side you are on.
